

I. PATIENT & GUARDIAN INFORMATION

Patient Full Name		Guardian / Next of Kin Name	
Age / Gender		Relation to Patient	
UHID / Reg No.		Guardian Contact Number	
Primary Diagnosis		Guardian Govt ID / Address	

II. SCOPE OF CLINICAL CARE & PROTOCOLS

- ✓ **Tracheostomy Care:** Daily sterile stoma cleaning, cuff pressure monitoring, and inner cannula exchanges to maintain tube patency.
- ✓ **Mechanical Ventilation:** Continuous monitoring of portable ventilator, BiPAP, or CPAP settings including pressures and rates.
- ✓ **Airway Suctioning:** Clean/sterile suctioning using closed-suction systems to safely clear pulmonary secretions.
- ✓ **Respiratory Weaning:** Progressive trials (T-piece pacing, cuff deflation, capping trials) under consultant supervision.

III. ANTICIPATED RISKS & CLINICAL COMPLICATIONS

AIRWAY OCCLUSION

Sudden thick mucus plugs blocking the tracheostomy tube, resulting in severe desaturation, breathing arrest, or brain hypoxia.

ACCIDENTAL DECANNULATION

Dislodgement of the tube during coughing, transfers, or patient movement, which requires high-urgency professional re-insertion.

TRACHEAL & LUNG INJURY

Tracheal stenosis (scarring), stoma bleeding, subcutaneous emphysema (trapped air under skin), or pneumothorax (collapsed lung).

PNEUMONIA & ARREST

Ventilator-associated pneumonia (VAP), pulmonary infections, severe arrhythmias, or sudden systemic cardiac arrest.

IV. SPECIAL STEP-DOWN FACILITY DISCLOSURES

BOUNDARIES OF TRANSITIONAL INPATIENT CARE

The Guardian explicitly acknowledges that ActiveRehab TransCare is a specialized **Step-Down Transitional Inpatient Care & Rehabilitation Facility** and ****NOT**** a tertiary-care multi-specialty acute hospital. The facility is equipped with oxygen delivery lines, emergency airway carts, crash carts, portable ventilators, and resuscitation tools under on-site intensivists, but ****DOES NOT**** possess an emergency surgical operating theater, emergency bypass surgery access, or invasive arterial hemodynamic lines**.

V. EMERGENCY TERTIARY TRANSFER PROTOCOL

-  In the event of a severe, acute clinical deterioration or airway crisis that cannot be resolved on-site, the attending clinical team will immediately initiate resuscitation (CPR), high-flow oxygenation, and mechanical stabilization.
-  The facility will simultaneously initiate immediate emergency transit via an **Advanced Life Support (ALS) Cardiac Ambulance** equipped with transport ventilators and clinical escorts to a tertiary critical care facility.

Designated Tertiary Hospital Partner (To be filled by Guardian):

(If left blank or unavailable, the facility will transfer the patient to the nearest available tertiary hospital ICU).

VI. FINANCIAL RESPONSIBILITY & LIABILITY WAIVER

-  All costs associated with emergency transport, cardiac ambulance, and critical ICU admissions at the receiving tertiary hospital are the ****sole financial responsibility of the Guardian****.
-  The Guardian holds ActiveRehab TransCare free of any clinical or financial liability arising from emergency transit delays (due to traffic, transit variables, or tertiary hospital ICU bed availability).

VII. DECLARATION OF CONSENT & UNDERSTANDING

ENGLISH DECLARATION

I hereby declare that I have read this consent form (or had it translated to me in a language I fully understand). I have had a comprehensive discussion with Dr. Ashok P. Kota's clinical team regarding my patient's clinical state, the procedures, risks, and limitations of this step-down facility. I pre-authorize and consent to the Emergency Transfer Protocol and voluntary inpatient admission.

తెలుగు డిక్లరేషన్ (TELUGU DECLARATION)

నేను ఈ సమ్మతి పత్రం (consent form) లోని వివరాలను చదువుకున్నాను (లేదా నాకు తెలిసిన భాషలో అనువదించబడినది). నా రోగి యొక్క పరిస్థితి, ఇక్కడి చికిత్స విధానం మరియు అత్యవసర మార్పిడి విధానం (Emergency Transfer Protocol) గురించి వైద్యులతో నేను చర్చించాను. ఈ ట్రాన్సిఫర్ కేర్ కేంద్రం యొక్క పరిమితులను నేను పూర్తిగా అంగీకరిస్తూ, రోగి ప్రవేశానికి స్వచ్ఛందంగా సమ్మతిస్తున్నాను.

VIII. MEDICO-LEGAL EXECUTION SIGNATURES

SIGNATURE OF GUARDIAN / NEXT-OF-KIN

Name: _____ Relation: _____

SIGNATURE OF ATTENDING CLINICIAN

Name: Dr. Ashok P. Kota / Team Reg No: _____

SIGNATURE OF WITNESS 1 (GUARDIAN SIDE)

Name: _____ Date: ____/____/2026

SIGNATURE OF WITNESS 2 (FACILITY SIDE)

Name: _____ Date: ____/____/2026
