

Geriatric & Fall Prevention

Reclaiming confidence in every step. Senior balance reconditioning, muscle sarcopenia reversal, vertigo relief, and double-rail walking safety training.

INTERACTIVE RECOVERY PROTOCOL

DAYS 1 - 5: SAFETY SETUP & VESTIBULAR

Environmental Fall Risk (EFPT) assessment, baseline balance profiling, gentle posture stretching, and double-rail walking guides.

DAYS 6 - 15: STRENGTH & STANCE

Low-impact progressive muscle reconditioning to reverse sarcopenia, center-of-gravity drills, and proprioception balance pads exercises.

WEEKS 3 - 4: DUAL-TASK WALKING

Advanced dual-task cognitive walking drills (solving tasks while walking), home simulation transfers, and safe independent pacing.

EXPECTATIONS

> Balance Framework

EFPT training to clear thresholds, rugs, and overcome trip risks.

> Vestibular Rehab

Epley maneuvers and gaze stabilization (VOR) to cure senior vertigo.

> Sarcopenia Reversal

Custom clinical calf, quad, and spinal stabilizer strengthening.

> Proprioception Pods

High-density balance pads and dynamic tilt wobble boards.

VERIFY ADMISSION ELIGIBILITY

Conduct standard fall-risk screening, coordinate hospital transfers, and secure your specialized senior recovery suite.
